- 

1. Design a form for on-line booking of movie tickets. It should have a Display button which will display movies for a week during morning, afternoon, evening and night shows along with prices. There should be validation checks for null fields. After pressing a Submit button, the system should generate a slip indicating the name, the name of the show and show timing. 20
  
  2. Write a JavaScript code to move a text with a mouse pointer. 20
