No. of Printed Pages : 4

BME-061

**DIPLOMA IN MECHANICAL ENGINEERING
(DME)**

Term-End Examination

December, 2015

BME-061 : AUTOMOBILE ENGINEERING

Time : 2 hours

Maximum Marks : 70

Note : Answer five questions in all. Question no. 1 is compulsory. All questions carry equal marks. Use of scientific calculator is permitted.

1. Multiple choice questions. Choose correct answer. $7 \times 2 = 14$
- (i) The radiator tubes are manufactured by using
- (a) CI tubes
 - (b) Aluminium tubes
 - (c) Brass tubes
 - (d) Steel tubes
- (ii) Knowing the IHP and FHP of an engine, we can calculate
- (a) Compression ratio
 - (b) rpm
 - (c) SAF
 - (d) BHP

- (iii) The average pressure during the power stroke minus the average pressure during the intake, compression and exhaust is called
- (a) IHP
 - (b) BHP
 - (c) Compression ratio
 - (d) m.e.p.
- (iv) The device for smoothing out the power impulses from the engine is called
- (a) Flywheel
 - (b) Cam shaft
 - (c) Crank shaft
 - (d) Clutch
- (v) In 4-stroke diesel engine, during compression stroke
- (a) the piston moves from BDC to TDC
 - (b) the piston moves from TDC to BDC
 - (c) the crank rotates by 90°
 - (d) the crank rotates by 270°
- (vi) The active material in a charged negative plate is
- (a) Lead sulphate
 - (b) Lead peroxide
 - (c) Lead metal
 - (d) Lead perchloride

- (vii) The brake-shoes are curved to conform to the inner dia of the
- (a) Tyre
 - (b) Wheel
 - (c) Pedal
 - (d) Brake drum
2. (a) Discuss the working of Davis steering with a neat sketch. 7
- (b) Describe the working of the clutch system widely used in two wheelers. 7
3. (a) Discuss the working of 2-stroke SI (petrol) engine with a neat sketch. 7
- (b) Explain the differences between 2-stroke and 4-stroke engines. 7
4. (a) Describe the working of a battery ignition system with the help of a suitable diagram. 7
- (b) Describe the working of a differential with a neat sketch. 7
5. (a) List the advantages of tubeless tyres. 7
- (b) What do you mean by chassis ? Explain. 7

6. Write short notes on the following :

$$4 \times 3 \frac{1}{2} = 14$$

- (a) Mufflers
- (b) Telescopic Shock Absorber
- (c) Power Steering
- (d) Camber Angle

7. (a) Describe in brief the leaf spring suspension system. 7

(b) The gearing of a machine tool is shown in Figure 1. The motor shaft is connected to gear A and rotates at 975 rpm. The gear wheels B, C, D and E are fixed to parallel shafts rotating together. The final gear F is fixed on the output shaft. What is the speed of gear F? The number of teeth on each gear are as given below : 7

Gear	A	B	C	D	E	F
No. of teeth	20	50	25	75	26	65
