## 52124

# MASTER OF COMPUTER <br> APPLICATION (REVISED)/BACHELOR OF COMPUTER APPLICATION (REVISED) (MCA/BCA) <br> Term-End Examination <br> December, 2019 <br> MCS-011 : PROBLEM SOLVING AND PROGRAMMING 

Time: 3 Hours
Maximum Marks : 100
Weigntage : 75\%
Note : Question No. 1 is compulsory. Attempt any three questions from the rest.

1. (a) Write an algorithm and draw the corresponding flowchart to find the GCD $\begin{array}{lr}\text { (Greatest Common Divisor) of } 2 \text { given } \\ \text { integers. } & 10\end{array}$
(b) Write a program to reverse an input string using pointers.
(c) Write a program using structures to find the Gross salary and Net salary for 5 employees of a small retail outlet if BASIC, TA, DA, HRA, Other Allowances and Deductions are given as input.

Where Gross Salary = BASIC + TA + DA + HRA + Other Allowances and Net Salary = Gross Salary - Deductions. 10
(d) Write a program using File-Handling to count the no. of characters in a given dat file. 10
2. (a) Compare while and do-while loop. Write a small code segment for each to explain the difference between them. 10
(b) Give the $\mathbb{C}$ expressions for the following algebraic expressions :
(i) $\frac{a^{*} 4 c^{2}-d}{m+n}$
(ii) $a b-(e+f) \frac{4}{3}$
3. (a) What are the use of the following along with their syntax and suitable example for each :
(i) Puts and Gets
(ii) Break Statement
(iii) Continue
(b) Define a Variable. How are variables declared in C? What are the rules to name a variable in C? How to assign a value to the variable at the time of declaration ? Explain with suitable examples.
(c) Explain with an example program code segment, the array of a structure. 8
4. (a) Write a program in C to find the largest and smallest number in an array of 100 integers. 10
(b) Write a program to find out square and cube of a given number using macros. 6
(c) What is a logical error in C? Give an example of it.
5. (a) Explain the use of the following functions in C : $4 \times 2 \frac{1}{2}=10$
(i) malloc()
(ii) fseek()
(iii) ftell()
(iv) realloc()
(b) Define an array. How are ärrays declared and initialized? Write a C program to add two metrices A and B of size $3 \times 3$. 10
