## Diploma in Civil Engineering

## Term-End Examination June, 2012

## BCE-062 : CONSTRUCTION SUPERVISION AND BUILDING MAINTENANCE

| Time | : <b>2</b> H | ours Maximum Marks : <b>70</b>  |
|------|--------------|---|
| Note |              | uestion number 1 is compulsory. Answer any four om the remaining questions. |
| 1.   |              | n the blanks by choosing the most appropriate                               |
|      |              | d / words from the options given in the                                     |
|      | brac         | ket: 14x1=14  |
|      | (a)          | A drawing representing all the three  |
|      |              | dimensions of an object is  |
|      |              | (plan / elevation / isometric view )  |
|      | (b)          | The drawing size 594mm x 841mm refers                                       |
|      |              | to drawing.   |
|      |              | $(A_1 / A_2 / A_3)$   |
|      | (c)          | The information given in the drawing is                                     |
|      | ` '          | usually supplemented by   |
|      |              | (highlights / information / notes )   |
|      | (d)          | The drawings that provide information                                       |
|      | (u)          | -   |
|      |              | regarding layout and details of sewage are                                  |
|      |              | drawings.   |
|      |              | (utility / service / piping)  |

| (e) | The stock register which shows daily receipts   |
|-----|---|
|     | and issue of items is closed                    |
|     | (annually / monthly / quarterly)                |
| (f) | The work awarded to a contractor on the         |
|     | basis of execution of the said work in totality |
|     | refers to contract.                             |
|     | (lump sum / price rate / item rate)             |
| (g) | Filling with excavated earth shall be done      |
|     | in regular horizontal layers not exceeding      |
|     | cm in depth.                                    |
|     | (10 /20 / 35)                                   |
| (h) | Aggregate which passes through                  |
|     | mm IS sieve is known as fine                    |
|     | aggregate.                                      |
|     | (3.50 / 4.75 / 6.00 )                           |
| (i) | The sap stain defect in timber by fungi         |
|     | generally occurs where moisture content         |
|     | exceeds %.                                      |
|     | (20 / 25 / 30 )                                 |
| (j) | The jointing of SW pipes is done by             |
|     | ·   |
|     | (MS bolting/ CM caulking / Gas welding)         |
| (k) | The tap used in the bathroom is also known      |
|     | as  |
|     | (stop cock/ bib cock / check cock)              |
| (l) | The water closet which has no provision of      |
|     | foot rest is called                             |
|     | (IWC / EWC / FWC)                               |

- (m) \_\_\_\_\_ wood does not with stand the attack of white ants.(teak / deodar/ mango)
- (n) The side overlap is CGI sheet roofing must not be less than \_\_\_\_\_ corrugation.

$$\left(\frac{3}{4} / 1 / 1\frac{1}{2}\right)$$

- 2. (a) Explain the method of repairs of concrete floor, terrazzo floor and marble floor. 3+3+2=8
  - (b) Discuss the need of water proofing. Enlist the types of water proofing and explain single ply materials used in water proofing.

2+2+2=6

- (a) Discuss the importance of PVC pipes used for water supply and explain any three types of jointing methods.
  - (b) Describe the methods of protecting 6 reinforcement steel from chloride ion.
- 4. (a) Explain the functions of bib cock and stop cock. What are the probable defects in manufacturing and construction of these fittings?
  3+5=8
  - (b) Discuss the position of the construction supervisor on a construction site. What are the responsibilities of a construction supervisor?

- 5. (a) Generate points of the check list for 8 inspecting ACC roofing and ceiling.
  - (b) Describe the guide lines for proper 6 compaction of concrete using a poker vibrator.
- 6. (a) Explain the basic principle of anti termite treatment. Discuss the treatment of foundations and basements for masonry. 4+4=8
  - (b) What do you understand by progress measurement? Discuss the methods to display the progress of a project.2+4=6

 $4x3^{1/2}=14$ 

- 7. Write short notes on *any four* of the following:
  - (a) Conflicting dimensions
  - (b) Site diary
  - (c) Curing
  - (d) Chromium plating
  - (e) Scrapper
  - (f) Nitomortar.
