June, 2017**

BNS-104 : COMMUNICATIVE ENGLISH

Time : 3 hours

Maximum Marks : 70

Note : Attempt all questions.

1. Read the passage given below and answer the questions that follows :

The shortage of organ donors has caused several doctors to call for urgent improvements to be made to the system by which organs are donated. Many Countries, such as Britain, have huge waiting lists of people whose lives could be saved by being given a kidney, lung, heart, or liver transplant, sadly, many of them die before they reach the top of those lists. Under the present British scheme, people are asked to carry donor cards, and/or put their names on the national donor register. Thus, if they lose their lives suddenly, for example, in a traffic accident, they have given permission in advance of their deaths for their organs to be used. If they have not done so, surgeons are faced with the task of asking the distraught next-of-kin for permission of use the organs of the deceased, organ transplant have to take place quite soon after the death of the donor.

Increasing the number of donors is made more difficult because it is such an emotive issue.

- (a) In the above passage which aspect of donation is described by author. 1
