Note : This question paper has seven questions. All questions are compulsory.

1. Read the passage given below and answer the question that follow :

July 1 is observed as Doctors' Day in India to honour the legendary physician, Dr. B. C. Roy whose birth and death anniversary falls on the same day. The day is an opportunity to raise awareness about the doctor's role in our daily

lives—a day when people across the country acknowledge the commitment and dedication of the medical and health care fraternity towards society. It is also a significant day for doctors themselves as it provides them an opportunity to reflect on their career and remind themselves of ethics of medicine.

India is unique in the sense that patients revere their doctors, a majority of whom are sincere, honest and ethical. However, due to unethical practices by a small percentage of doctors (numbers increasing exponentially though), faith in the medical profession, which once was considered the noblest of all, has taken a beating.

Greed, lack of regulation, lack of accountability, lack of firm laws and a lenient society has allowed unholy nexus between doctors, hospitals, diagnostic centres and pharma industry.

The patient trusts and places his life in the hands of doctor. The doctor is, therefore, duty-bound to have a higher level of moral code of conduct than those in other professions and must understand that he/she is in a very privileged position.

- (a) What is the reason for the 'unholy nexus' between doctors, hospitals, diagnostic centres and the pharma industry ? 3
- (b) Why is July 1 a significant day for doctors ? 3
- (c) Why is India unique in the context of this passage ? 2
- (d) Why should the doctor have a higher level of moral code of conduct ? 2
