

**EXECUTIVE MBA
(EXMBA)**

**Term-End Examination
June, 2011**

MCT-060 : OPERATIONS MANAGEMENT

Time : 3 hours

Maximum Marks : 100

Note : Attempt any five questions and all questions carry equal marks.

1. (a) Define and compare strategic and operating decisions. 10
- (b) Explain major factors affecting process design decisions. 10

2. (a) Compare and contrast Product focussed, Process focussed and Group technology process Designs. 10
- (b) Discuss the relationship between Process Design and Product Design. 10

3. (a) Compare Product layouts and Fixed Position layouts by giving examples. 10
- (b) How do we design service facility layouts ? Explain by giving example of a Bank Branch. 10

4. (a) Explain and differentiate Breakdown maintenance Preventive maintenance. 10
- (b) Explain stepwise as to how we determine labour standard time by using stop watch time study. 10
5. (a) Compare MRP-I and MRP-II with the help of suitable examples. 10
- (b) Demand of an Item X is normally distributed with a mean of 693.7 kg and SD of 139.27 kg. What is EDDLT for Item X ? What is σ_{DDLT} ? If the production manager specifies a 95% service level during lead time, what safety stock should be maintained ? 10
- Note : A table has been provided in this regard at the end of the question paper.**
6. (a) What is the difference between Push and Pull Approach of production planning system ? 10
- (b) What are ISO 9000 standards ? How do they help in improving gravity of product and services ? 10

7. Write *short notes* on any *four* of the following : 20

- (a) Sampling techniques.
- (b) KAIZEN.
- (c) ABC and VED classification.
- (d) PDCA cycle.
- (e) Forward and Backward scheduling.
- (f) Concurrent Engineering

8. What do you mean by Enterprise Resource Planning (ERP) system ? Explain with the help of suitable example. How it is different from Computer Integrated Manufacturing System (CIMS) ? 20
