LSE-13

ASSIGNMENT BOOKLET Bachelor's Degree Programme (B.Sc.)

Plant Diversity-II

Valid from 1st January 2024 to 31st December 2024

It is compulsory to submit the Assignment before filling in the Term-End Examination Form.

Please Note

- You can take electives '56 to 64' credits from a minimum of TWO and a maximum of FOUR science disciplines, viz. Physics, Chemistry, Life Sciences and Mathematics.
- You can opt for elective courses worth a MINIMUM OF 8 CREDITS and a MAXIMUM OF 48 CREDITS from any of these four disciplines.
- At least 25% of the total credits that you register for in the elective courses from Life Sciences, Chemistry and Physics disciplines must be from the laboratory courses. For example, if you opt for a total of 64 credits of electives in these 3 disciplines, at least 16 credits 'out of those 64 credits' should be from lab courses.
- You cannot appear in the Term-End Examination of any course without registering for the course. Otherwise, your result will not be declared and the 'responsibility will be yours'.

School of Sciences Indira Gandhi National Open University Maidan Garhi, New Delhi-110068

(2024)

Dear Student,

We hope you are familiar with the system of evaluation to be followed for the Bachelor's Degree Programme. At this stage you may probably like to re-read the section on assignments for Elective Courses in the Programme Guide that we sent you after your enrolment. A weightage of 30 per cent, as you are aware, has been earmarked for continuous evaluation which would consist of **one tutor-marked assignment (TMA)** for this course.

Instructions for Formatting Your Assignments

Before attempting the assignment please read the following instructions carefully.

1) On top of the first page of your TMA answer sheet, please write the details exactly in the following format:

	NAME :	NT NO.:
COURSE CODE :		
COURSE TITLE :		
ASSIGNMENT NO.		
STUDY CENTRE :		DATE:

PLEASE FOLLOW THE ABOVE FORMAT STRICTLY TO FACILITATE EVALUATION AND TO AVOID DELAY.

- 2) Use only foolscap size writing paper (but not of very thin variety) for writing your answers.
- 3) Leave 4 cm margin on the left, top and bottom of your answer sheet.
- 4) Your answers should be precise.
- 5) While solving problems, clearly indicate the question number along with the part being solved. Be precise.
- 6) This assignment will remain valid for one year from January 1, 2024 to December 31, 2024. However, you are advised to submit it within 12 weeks of receiving this booklet to accomplish its purpose as a teaching-tool. Answer sheets received after the due date shall not be accepted.
- 7) You cannot fill the exam form for this course until you have submitted this assignment.

We strongly feel that you should retain a copy of your assignment response to avoid any unforeseen situation and append, if possible, a photocopy of this booklet with your response.

We wish you good luck!

ASSIGNMENT (Tutor Marked Assignment)

Course Code: LSE-13 Assignment Code: LSE-13/TMA/2024

Max. Marks: 100

(a) Mycorrhiza (b) Microsporogenesis (c) Embryogeny (d) Medicinal uses of Taxus (e) Insectivorous plants (f) Double fertilization (g) Haustoria (h) Phylloclade 2. (a) Write the differences between gymnosperms and angiosperms. (5) (b) Describe cycles in gymnosperms with proper diagrams. (5) 3. Describe megasporangium, megasporogenesis and female gametophyte. (10) 4. Describe how Gnetum resembles angiosperms in many respects? (10) 5. a) What is resin and what are its sources? (5) b) Give the name of five major timber yielding conifers of India. (5) 6. Draw the labeled diagram of the following: (2½×4 = 10) a) T.S. of root of Orchid b) Structure of shoot apex c) C.S. of hypocotyl of Ricinus d) Colloroid root of Cycas 7. Write a brief account on the economic importance of families Rubiaceae and Asteraceae. 8. Differentiate between following pair of terms: (2½×5 = 20) a) Storied and nonstoried cambium b) Lamellar and lacunar collenchymas c) Brachysclereid and macrosclereid d) Tracheids and vessel elements e) Simple and compound sieve areas	1.	Write short notes on the following:		$(2\frac{1}{2} \times 8 = 20)$	
(c) Embryogeny (d) Medicinal uses of <i>Taxus</i> (e) Insectivorous plants (f) Double fertilization (g) Haustoria (h) Phylloclade 2. (a) Write the differences between gymnosperms and angiosperms. (5) (b) Describe cycles in gymnosperms with proper diagrams. (5) 3. Describe megasporangium, megasporogenesis and female gametophyte. (10) 4. Describe how <i>Gnetum</i> resembles angiosperms in many respects? (10) 5. a) What is resin and what are its sources? (5) b) Give the name of five major timber yielding conifers of India. (5) 6. Draw the labeled diagram of the following: (2½×4 = 10) a) T.S. of root of Orchid b) Structure of shoot apex c) C.S. of hypocotyl of <i>Ricinus</i> d) Colloroid root of <i>Cycas</i> 7. Write a brief account on the economic importance of families Rubiaceae and Asteraceae. 8. Differentiate between following pair of terms: (2½×5 = 20) a) Storied and nonstoried cambium b) Lamellar and lacunar collenchymas c) Brachysclereid and macrosclereid d) Tracheids and vessel elements		(a)	Mycorrhiza		
(d) Medicinal uses of <i>Taxus</i> (e) Insectivorous plants (f) Double fertilization (g) Haustoria (h) Phylloclade 2. (a) Write the differences between gymnosperms and angiosperms. (5) (b) Describe cycles in gymnosperms with proper diagrams. (5) 3. Describe megasporangium, megasporogenesis and female gametophyte. (10) 4. Describe how <i>Gnetum</i> resembles angiosperms in many respects? (10) 5. a) What is resin and what are its sources? (5) b) Give the name of five major timber yielding conifers of India. (5) 6. Draw the labeled diagram of the following: (2½×4 = 10) a) T.S. of root of Orchid b) Structure of shoot apex c) C.S. of hypocotyl of <i>Ricinus</i> d) Colloroid root of <i>Cycas</i> 7. Write a brief account on the economic importance of families Rubiaceae and Asteraceae. 8. Differentiate between following pair of terms: (2½×5 = 20) a) Storied and nonstoried cambium b) Lamellar and lacunar collenchymas c) Brachysclereid and macrosclereid d) Tracheids and vessel elements		(b)	Microsporogenesis		
(e) Insectivorous plants (f) Double fertilization (g) Haustoria (h) Phylloclade 2. (a) Write the differences between gymnosperms and angiosperms. (5) (b) Describe cycles in gymnosperms with proper diagrams. (5) 3. Describe megasporangium, megasporogenesis and female gametophyte. (10) 4. Describe how <i>Gnetum</i> resembles angiosperms in many respects? (10) 5. a) What is resin and what are its sources? (5) b) Give the name of five major timber yielding conifers of India. (5) 6. Draw the labeled diagram of the following: (2½×4 = 10) a) T.S. of root of Orchid b) Structure of shoot apex c) C.S. of hypocotyl of <i>Ricinus</i> d) Colloroid root of <i>Cycas</i> 7. Write a brief account on the economic importance of families Rubiaceae and Asteraceae. 8. Differentiate between following pair of terms: (2½×5 = 20) a) Storied and nonstoried cambium b) Lamellar and lacunar collenchymas c) Brachysclereid and macrosclereid d) Tracheids and vessel elements		(c)	Embryogeny		
(f) Double fertilization (g) Haustoria (h) Phylloclade 2. (a) Write the differences between gymnosperms and angiosperms. (5) (b) Describe cycles in gymnosperms with proper diagrams. (5) 3. Describe megasporangium, megasporogenesis and female gametophyte. (10) 4. Describe how <i>Gnetum</i> resembles angiosperms in many respects? (10) 5. a) What is resin and what are its sources? (5) b) Give the name of five major timber yielding conifers of India. (5) 6. Draw the labeled diagram of the following: (2½×4 = 10) a) T.S. of root of Orchid b) Structure of shoot apex c) C.S. of hypocotyl of <i>Ricinus</i> d) Colloroid root of <i>Cycas</i> 7. Write a brief account on the economic importance of families Rubiaceae and Asteraceae. 8. Differentiate between following pair of terms: (2½×5 = 20) a) Storied and nonstoried cambium b) Lamellar and lacunar collenchymas c) Brachysclereid and macrosclereid d) Tracheids and vessel elements		(d)	Medicinal uses of Taxus		
(g) Haustoria (h) Phylloclade 2. (a) Write the differences between gymnosperms and angiosperms. (5) (b) Describe cycles in gymnosperms with proper diagrams. (5) 3. Describe megasporangium, megasporogenesis and female gametophyte. (10) 4. Describe how <i>Gnetum</i> resembles angiosperms in many respects? (10) 5. a) What is resin and what are its sources? (5) (b) Give the name of five major timber yielding conifers of India. (5) 6. Draw the labeled diagram of the following: (2½×4 = 10) (a) T.S. of root of Orchid (b) Structure of shoot apex (c) C.S. of hypocotyl of <i>Ricinus</i> (d) Colloroid root of <i>Cycas</i> 7. Write a brief account on the economic importance of families Rubiaceae and Asteraceae. 8. Differentiate between following pair of terms: (2½×5 = 20) (a) Storied and nonstoried cambium (b) Lamellar and lacunar collenchymas (c) Brachysclereid and macrosclereid (d) Tracheids and vessel elements		(e)	Insectivorous plants		
(h) Phylloclade 2. (a) Write the differences between gymnosperms and angiosperms. (5) (b) Describe cycles in gymnosperms with proper diagrams. (5) 3. Describe megasporangium, megasporogenesis and female gametophyte. (10) 4. Describe how <i>Gnetum</i> resembles angiosperms in many respects? (10) 5. a) What is resin and what are its sources? (5) (b) Give the name of five major timber yielding conifers of India. (5) 6. Draw the labeled diagram of the following: (2½×4 = 10) (a) T.S. of root of Orchid (b) Structure of shoot apex (c) C.S. of hypocotyl of <i>Ricinus</i> (d) Colloroid root of <i>Cycas</i> 7. Write a brief account on the economic importance of families Rubiaceae and Asteraceae. 8. Differentiate between following pair of terms: (2½×5 = 20) (a) Storied and nonstoried cambium (b) Lamellar and lacunar collenchymas (c) Brachysclereid and macrosclereid (d) Tracheids and vessel elements		(f)	Double fertilization		
 (a) Write the differences between gymnosperms and angiosperms. (b) Describe cycles in gymnosperms with proper diagrams. (5) 3. Describe megasporangium, megasporogenesis and female gametophyte. (10) 4. Describe how <i>Gnetum</i> resembles angiosperms in many respects? (10) 5. a) What is resin and what are its sources? (5) (6) Draw the labeled diagram of the following: (2½×4 = 10) (2½×4 = 10) (2½×4 = 10) (2½×5 = 20) 		(g)	Haustoria		
(b) Describe cycles in gymnosperms with proper diagrams. (5) 3. Describe megasporangium, megasporogenesis and female gametophyte. (10) 4. Describe how <i>Gnetum</i> resembles angiosperms in many respects? (10) 5. a) What is resin and what are its sources? (5) b) Give the name of five major timber yielding conifers of India. (5) 6. Draw the labeled diagram of the following: (2½×4 = 10) a) T.S. of root of Orchid b) Structure of shoot apex c) C.S. of hypocotyl of <i>Ricinus</i> d) Colloroid root of <i>Cycas</i> 7. Write a brief account on the economic importance of families Rubiaceae and Asteraceae. 8. Differentiate between following pair of terms: (2½×5 = 20) a) Storied and nonstoried cambium b) Lamellar and lacunar collenchymas c) Brachysclereid and macrosclereid d) Tracheids and vessel elements		(h)	Phylloclade		
 Describe megasporangium, megasporogenesis and female gametophyte. (10) Describe how <i>Gnetum</i> resembles angiosperms in many respects? (10) a) What is resin and what are its sources? (5) b) Give the name of five major timber yielding conifers of India. (5) Draw the labeled diagram of the following: (2½×4 = 10) a) T.S. of root of Orchid b) Structure of shoot apex c) C.S. of hypocotyl of <i>Ricinus</i> d) Colloroid root of <i>Cycas</i> Write a brief account on the economic importance of families Rubiaceae and Asteraceae. Differentiate between following pair of terms: (2½×5 = 20) a) Storied and nonstoried cambium b) Lamellar and lacunar collenchymas c) Brachysclereid and macrosclereid d) Tracheids and vessel elements 	2.	(a)	Write the differences between gymnosperms and angiosperms.	(5)	
 4. Describe how <i>Gnetum</i> resembles angiosperms in many respects? (10) 5. a) What is resin and what are its sources? (5) b) Give the name of five major timber yielding conifers of India. (5) 6. Draw the labeled diagram of the following: (2½×4 = 10) a) T.S. of root of Orchid b) Structure of shoot apex c) C.S. of hypocotyl of <i>Ricinus</i> d) Colloroid root of <i>Cycas</i> 7. Write a brief account on the economic importance of families Rubiaceae and Asteraceae. 8. Differentiate between following pair of terms: (2½×5 = 20) a) Storied and nonstoried cambium b) Lamellar and lacunar collenchymas c) Brachysclereid and macrosclereid d) Tracheids and vessel elements 		(b)	Describe cycles in gymnosperms with proper diagrams.	(5)	
5. a) What is resin and what are its sources? (5) b) Give the name of five major timber yielding conifers of India. (5) 6. Draw the labeled diagram of the following: (2½×4 = 10) a) T.S. of root of Orchid b) Structure of shoot apex c) C.S. of hypocotyl of <i>Ricinus</i> d) Colloroid root of <i>Cycas</i> 7. Write a brief account on the economic importance of families Rubiaceae and Asteraceae. 8. Differentiate between following pair of terms: (2½×5 = 20) a) Storied and nonstoried cambium b) Lamellar and lacunar collenchymas c) Brachysclereid and macrosclereid d) Tracheids and vessel elements	3.	Describe megasporangium, megasporogenesis and female gametophyte.		(10)	
b) Give the name of five major timber yielding conifers of India. (5) 6. Draw the labeled diagram of the following: (2½×4 = 10) a) T.S. of root of Orchid b) Structure of shoot apex c) C.S. of hypocotyl of <i>Ricinus</i> d) Colloroid root of <i>Cycas</i> 7. Write a brief account on the economic importance of families Rubiaceae and Asteraceae. (10) a) Storied and nonstoried cambium b) Lamellar and lacunar collenchymas c) Brachysclereid and macrosclereid d) Tracheids and vessel elements	4.	Describe how Gnetum resembles angiosperms in many respects?			
 6. Draw the labeled diagram of the following: a) T.S. of root of Orchid b) Structure of shoot apex c) C.S. of hypocotyl of <i>Ricinus</i> d) Colloroid root of <i>Cycas</i> 7. Write a brief account on the economic importance of families Rubiaceae and Asteraceae. 8. Differentiate between following pair of terms: a) Storied and nonstoried cambium b) Lamellar and lacunar collenchymas c) Brachysclereid and macrosclereid d) Tracheids and vessel elements 	5.	a)	What is resin and what are its sources?	(5)	
 a) T.S. of root of Orchid b) Structure of shoot apex c) C.S. of hypocotyl of <i>Ricinus</i> d) Colloroid root of <i>Cycas</i> 7. Write a brief account on the economic importance of families Rubiaceae and Asteraceae. 8. Differentiate between following pair of terms: (2½×5 = 20) a) Storied and nonstoried cambium b) Lamellar and lacunar collenchymas c) Brachysclereid and macrosclereid d) Tracheids and vessel elements 		b)	Give the name of five major timber yielding conifers of India.	(5)	
b) Structure of shoot apex c) C.S. of hypocotyl of <i>Ricinus</i> d) Colloroid root of <i>Cycas</i> 7. Write a brief account on the economic importance of families Rubiaceae and Asteraceae. 8. Differentiate between following pair of terms: (2½×5 = 20) a) Storied and nonstoried cambium b) Lamellar and lacunar collenchymas c) Brachysclereid and macrosclereid d) Tracheids and vessel elements	6.	Draw the labeled diagram of the following:		$(2\frac{1}{2} \times 4 = 10)$	
c) C.S. of hypocotyl of <i>Ricinus</i> d) Colloroid root of <i>Cycas</i> 7. Write a brief account on the economic importance of families Rubiaceae and Asteraceae. 8. Differentiate between following pair of terms: (2½×5 = 20) a) Storied and nonstoried cambium b) Lamellar and lacunar collenchymas c) Brachysclereid and macrosclereid d) Tracheids and vessel elements		a)	T.S. of root of Orchid		
 d) Colloroid root of <i>Cycas</i> 7. Write a brief account on the economic importance of families Rubiaceae and Asteraceae. (10) 8. Differentiate between following pair of terms: (2½×5 = 20) a) Storied and nonstoried cambium b) Lamellar and lacunar collenchymas c) Brachysclereid and macrosclereid d) Tracheids and vessel elements 		b)	Structure of shoot apex		
 7. Write a brief account on the economic importance of families Rubiaceae and Asteraceae. 8. Differentiate between following pair of terms: (2½×5 = 20) a) Storied and nonstoried cambium b) Lamellar and lacunar collenchymas c) Brachysclereid and macrosclereid d) Tracheids and vessel elements 		c)	C.S. of hypocotyl of <i>Ricinus</i>		
and Asteraceae. 8. Differentiate between following pair of terms: a) Storied and nonstoried cambium b) Lamellar and lacunar collenchymas c) Brachysclereid and macrosclereid d) Tracheids and vessel elements		d)	Colloroid root of Cycas		
 a) Storied and nonstoried cambium b) Lamellar and lacunar collenchymas c) Brachysclereid and macrosclereid d) Tracheids and vessel elements 	7.		<u>.</u>		
 b) Lamellar and lacunar collenchymas c) Brachysclereid and macrosclereid d) Tracheids and vessel elements 	8.	Differentiate between following pair of terms:		$(2\frac{1}{2} \times 5 = 20)$	
c) Brachysclereid and macrosclereidd) Tracheids and vessel elements		a)	Storied and nonstoried cambium		
d) Tracheids and vessel elements		b)	Lamellar and lacunar collenchymas		
		c)	Brachysclereid and macrosclereid		
e) Simple and compound sieve areas		d)	Tracheids and vessel elements		
c) Simple and compound sieve areas		e)	Simple and compound sieve areas
