

ASSIGNMENT BOOKLET
Bachelor's Degree Programme (B.Sc.)

Plant Diversity-II

Valid from 1st January 2021 to 31st December 2021

**It is compulsory to submit the Assignment before filling in the
Term-End Examination Form.**

Please Note

- You can take electives '56 to 64' credits from a minimum of TWO and a maximum of FOUR science disciplines, viz. Physics, Chemistry, Life Sciences and Mathematics.
- You can opt for elective courses worth a MINIMUM OF 8 CREDITS and a MAXIMUM OF 48 CREDITS from any of these four disciplines.
- At least 25% of the total credits that you register for in the elective courses from Life Sciences, Chemistry and Physics disciplines must be from the laboratory courses. For example, if you opt for a total of 64 credits of electives in these 3 disciplines, at least 16 credits 'out of those 64 credits' should be from lab courses.
- You cannot appear in the Term-End Examination of any course without registering for the course. Otherwise, your result will not be declared and the 'responsibility will be yours'.

(2021)

Dear Student,

We hope you are familiar with the system of evaluation to be followed for the Bachelor's Degree Programme. At this stage you may probably like to re-read the section on assignments for Elective Courses in the Programme Guide that we sent you after your enrolment. A weightage of 30 per cent, as you are aware, has been earmarked for continuous evaluation which would consist of **one tutor-marked assignment (TMA)** for this course.

Instructions for Formatting Your Assignments

Before attempting the assignment please read the following instructions carefully.

- 1) On top of the first page of your TMA answer sheet, please write the details exactly in the following format:

ENROLMENT NO.:

NAME :

ADDRESS

.....

COURSE CODE :

COURSE TITLE :

ASSIGNMENT NO.:

STUDY CENTRE : DATE:

PLEASE FOLLOW THE ABOVE FORMAT STRICTLY TO FACILITATE EVALUATION AND TO AVOID DELAY.

- 2) Use only foolscap size writing paper (but not of very thin variety) for writing your answers.
- 3) Leave 4 cm margin on the left, top and bottom of your answer sheet.
- 4) Your answers should be precise.
- 5) While solving problems, clearly indicate the question number along with the part being solved. Be precise.
- 6) **This assignment will remain valid for one year from January 1, 2021 to December 31, 2021.** However, you are advised to submit it within **12 weeks** of receiving this booklet to accomplish its purpose as a teaching-tool. Answer sheets received after the due date shall not be accepted.
- 7) **You cannot fill the exam form for this course until you have submitted this assignment.**

We strongly feel that you should retain a copy of your assignment response to avoid any unforeseen situation and append, if possible, a photocopy of this booklet with your response.

We wish you good luck!

ASSIGNMENT (Tutor Marked Assignment)

Course Code: LSE-13
Assignment Code: LSE-13/TMA/2021
Max. Marks: 100

1. a) Match the items in column A with those of column B.

<u>Column A</u>	<u>Column B</u>	(1×5=5)
i) Coralloid root	a) <i>Eichhornia crassipes</i>	
ii) Offset	b) Coriandrol	
iii) Kali torai	c) Verticillaster Inflorescence	
iv) Coriander	d) <i>Luffa acutangula</i>	
v) <i>Mentha spicata</i>	e) <i>Cycas</i> spp.	

- b) Give the botanical names of the following : (1×5=5)

- i) Clove
- ii) Papaya
- iii) Soybean
- iv) Sweet potato
- v) Cashewnut

2. Draw labelled diagrams of the following: (2×5=10)

- i) Androecium of *Pisum sativum* showing (9+1) arrangement of stamens.
- ii) L. S. of apple fruit.
- iii) Cross section of coffee berry showing its component parts.
- iv) A diagrammatic representation of collenchyma cells.
- v) Megasporophyll of *Cycas revoluta*

3. Describe the unique features of the following plants along with proper labelled diagram: (2×5=10)

- i) Roots of *Gladiolus*
- ii) Leaves of *Nepenthes*
- iii) Stem of turmeric
- iv) Arrangement of xylem in *Zea mays* stem
- v) Roots of Orchid

4. Discuss how angiospermic plants have become the most dominant form of plants in the world. (10)
5. a) Describe the reproductive structures with proper diagram of cycads. (5×2=10)
b) Write short note on the phylogeny of the carpel.
6. List any ten medicinally important plants and describe the morphology, plant parts used and uses of any two medicinal plants. (10)
7. Compare the families Brassicaceae and Labiatae with the reference to the following features: Leaf, Inflorescence, Flowers, Androecium, and Gynoecium. (10)
8. a) What is the difference between fixed oil and essential oil? Describe different methods used for the extraction of the essential oil. (5×2=10)
b) How sugarcane is vegetatively propagated? Write the steps involved in the manufacturing of sugar from sugarcane. What is nobilisation?
9. a) Botanical name of any four timber yielding plants. (2+2+6=10)
b) Give the botanical names of four pulse crop of India.
c) Describe the importance of Gymnosperms.
10. Compare the families Musaceae and Poaceae with the reference to the following features: (10)
Leaf, inflorescence, flowers, androccium, gynoecium.
