- 

**Note :** Perform following tasks by using any RDBMS available in system.

1. Create a database 'Catalog' with two tables 15  
– 'manifestation' and 'item'.
  - (a) Add the following fields in the table 'manifestation' : - Author, Title, Subject, Publisher Place and ISBN.
  - (b) Add five records in the table 'manifestation'.

2. (a) Add the following fields in the table 'item' : **10**  
Holding\_library, Acc\_No, Price and ISBN.  
(b) Add data for the above fields for the five records you have entered in table 'item'.
  
  3. Retrieve author, title and subject from the table **7½**  
'manifestation' for those records where author's name starts with 'a'.
  
  4. Retrieve contents of all fields from the table 'item' **7½**  
where place of publication is 'New Delhi' and price  $\leq$  1000.00.
