MCA (Revised)

Term-End Examination

June, 2021

MCS-052 : PRINCIPLES OF MANAGEMENT AND INFORMATION SYSTEMS

Time: 2 hours Maximum Marks: 50

Note: Question no. 1 is compulsory. Answer any three questions from the rest.

- (a) Explain any two distinctive ways of implementing an Enterprise Resource Planning System (ERP).
 - (b) Define Online Analytical Processing (OLAP). Describe its functionality. List and explain various types of OLAP.
 - (c) With the help of structural charts, explain Function-oriented organisation structure and Process-oriented organisation structure.

(i) Salami Slicing (ii) Cloning (iii) Carding (iv) Spoofing (v) Dumpster Diving 2. (a) Define Knowledge Management in an organisation. Also, explain its two generations. (b) With the help of a "Decision Step Gates" diagram, explain all the steps involved in Decision Gates process. 3. (a) Explain the following methods for valuation of project for an organisation: (i) Net Present Value (NPV) (ii) Expected Commercial Value (ECV) (b) Explain how Copyrights and Intellectual Property Rights (IPR) apply to electronic		(d)	With reference to computer crimes, explain	
 (ii) Cloning (iii) Carding (iv) Spoofing (v) Dumpster Diving 2. (a) Define Knowledge Management in an organisation. Also, explain its two generations. (b) With the help of a "Decision Step Gates" diagram, explain all the steps involved in Decision Gates process. 3. (a) Explain the following methods for valuation of project for an organisation: (i) Net Present Value (NPV) (ii) Expected Commercial Value (ECV) (b) Explain how Copyrights and Intellectual Property Rights (IPR) apply to electronic 			the following:	5
 (iii) Carding (iv) Spoofing (v) Dumpster Diving 2. (a) Define Knowledge Management in an organisation. Also, explain its two generations. (b) With the help of a "Decision Step Gates" diagram, explain all the steps involved in Decision Gates process. 3. (a) Explain the following methods for valuation of project for an organisation: (i) Net Present Value (NPV) (ii) Expected Commercial Value (ECV) (b) Explain how Copyrights and Intellectual Property Rights (IPR) apply to electronic 			(i) Salami Slicing	
 (iv) Spoofing (v) Dumpster Diving 2. (a) Define Knowledge Management in an organisation. Also, explain its two generations. (b) With the help of a "Decision Step Gates" diagram, explain all the steps involved in Decision Gates process. 3. (a) Explain the following methods for valuation of project for an organisation: (i) Net Present Value (NPV) (ii) Expected Commercial Value (ECV) (b) Explain how Copyrights and Intellectual Property Rights (IPR) apply to electronic 			(ii) Cloning	
 (v) Dumpster Diving 2. (a) Define Knowledge Management in an organisation. Also, explain its two generations. (b) With the help of a "Decision Step Gates" diagram, explain all the steps involved in Decision Gates process. 3. (a) Explain the following methods for valuation of project for an organisation: (i) Net Present Value (NPV) (ii) Expected Commercial Value (ECV) (b) Explain how Copyrights and Intellectual Property Rights (IPR) apply to electronic 			(iii) Carding	
 2. (a) Define Knowledge Management in an organisation. Also, explain its two generations. (b) With the help of a "Decision Step Gates" diagram, explain all the steps involved in Decision Gates process. 3. (a) Explain the following methods for valuation of project for an organisation: (i) Net Present Value (NPV) (ii) Expected Commercial Value (ECV) (b) Explain how Copyrights and Intellectual Property Rights (IPR) apply to electronic 			(iv) Spoofing	
organisation. Also, explain its two generations. (b) With the help of a "Decision Step Gates" diagram, explain all the steps involved in Decision Gates process. 3. (a) Explain the following methods for valuation of project for an organisation: (i) Net Present Value (NPV) (ii) Expected Commercial Value (ECV) (b) Explain how Copyrights and Intellectual Property Rights (IPR) apply to electronic			(v) Dumpster Diving	
 (b) With the help of a "Decision Step Gates" diagram, explain all the steps involved in Decision Gates process. 3. (a) Explain the following methods for valuation of project for an organisation: (i) Net Present Value (NPV) (ii) Expected Commercial Value (ECV) (b) Explain how Copyrights and Intellectual Property Rights (IPR) apply to electronic 	2.	(a)	organisation. Also, explain its two	F
diagram, explain all the steps involved in Decision Gates process. 3. (a) Explain the following methods for valuation of project for an organisation: (i) Net Present Value (NPV) (ii) Expected Commercial Value (ECV) (b) Explain how Copyrights and Intellectual Property Rights (IPR) apply to electronic			generations.	5
Decision Gates process. 3. (a) Explain the following methods for valuation of project for an organisation: (i) Net Present Value (NPV) (ii) Expected Commercial Value (ECV) (b) Explain how Copyrights and Intellectual Property Rights (IPR) apply to electronic		(b)	-	
3. (a) Explain the following methods for valuation of project for an organisation: (i) Net Present Value (NPV) (ii) Expected Commercial Value (ECV) (b) Explain how Copyrights and Intellectual Property Rights (IPR) apply to electronic				
valuation of project for an organisation : (i) Net Present Value (NPV) (ii) Expected Commercial Value (ECV) (b) Explain how Copyrights and Intellectual Property Rights (IPR) apply to electronic			Decision Gates process.	5
(ii) Expected Commercial Value (ECV)(b) Explain how Copyrights and Intellectual Property Rights (IPR) apply to electronic	3.	(a)		5
(b) Explain how Copyrights and Intellectual Property Rights (IPR) apply to electronic			(i) Net Present Value (NPV)	
Property Rights (IPR) apply to electronic			(ii) Expected Commercial Value (ECV)	
		(b)	Explain how Copyrights and Intellectual	
files.			Property Rights (IPR) apply to electronic	
			files.	5

4. (a) With respect to any Software company, explain the Business function and processes involved in Human Resource Department.

5

(b) Explain any two open-source 'Requirement Analysis Tools'.

5

5. Write short notes on the following:

 $4 \times 2\frac{1}{2} = 10$

- (a) Transaction Processing Systems
- (b) Strategic Decision-Making
- (c) General Problems of Empirical Research (in layered evaluation approach and in general approach)
- (d) Business Intelligence (BI)
