5. Answer the following : 5+5=10

Anuj is 17 months old. He weighs 11 kg. His temperature is 37.4°C. He is brought to the clinic because he has been coughing for 6 days.

The doctor checked for general danger signs. The mother said that Anuj is able to drink. He has not been vomiting. He has not had convulsions during illness. Anuj seems unusually sleepy. Doctors clapped his hands and asked mother to shake the child's arm. Anuj opened his eyes but did not look around. He stared blankly.

Then the doctor counted the number of breaths, the child took in a minute. He counted 41 breaths per minute. There was no chest indrawing. He did not hear stridor.

- (a) Classify Anuj's illness.
 - (b) Identify treatment for Anuj
-
