1.   The council of scientific and Industrial Research (CSIR) is an autonomous body of the   **40**
     Government of India, established in 1942. The objective of CSIR is to provide industrial
     competitiveness, social welfare and a strong S and T base for India.

     It has 38 laboratories conducting R and D activities in different fields of S and T
     at national level. Amongst them National Physical Laboratory, National Institute of
     Science, Technology and Developmental studies and National Institute of science,
     communication and Information Resources (NISCAIR) are a few.

     The mission of NISCAIR is to become prime custodian of all information resources
     on current and traditional knowledge systems in S and T in the country and promote
     communication of S and T information using most appropriate technology.

NISAIR provides information resources through electronic resources, inhouse databases and National science library (NSL). The NSL provides technical enquiry service, copying service and e-journal service. It has inhouse databases like NUCSSI, INPAT, MAPA and ISA. NISCAIR publishes 18 primary journals like Journal of Scientific and Industrial Research, Indian Journal of Chemistry etc. The CSIR performs its functions through a Governing Board, Advisory Board and Performance Appraisal Board. Based on the information provided above, design and develop a website for Council of Scientific and Industrial Research (CSIR) with link to three webpages a home page, NISCAIR and NSL the web pages should have the following features :

(a)   Background colour should be yellow and the text colour is blue.

(b)   Page should have a picture (.gif or .jpeg).

(c)   Provide links to Department of Biotechnology (dbtindia.nic.in) and Department of space (www. isro. org).

you may use various HTML features like tables, frames, lists, etc wherever required.
